

ATOMSTORE

# AtomStore integration instructions

# Recommendations in email messages - concept

Connect the Quarticon system to your AtomStore shop by simply adding your Quarticon account number in the shop's administration panel.

You don't have to do anything else.

The Quarticon team will agree with you the places and strategies of recommendations, and then configure the system.

Quarticon will automatically place recommendation frames in fixed places and adjust their appearance on mobile devices to the appearance of your shop.

**The system is fully automated and self-learning. Artificial Intelligence algorithms automatically learn users' preferences** based on the data they collect about their interactions with the online shop and display products tailored to their needs. **You do not need to manage the recommendation system after its implementation.**

# Merging your QuarticON account with your Atomstore shop

1. Ask QuarticOn representative to send you a unique account ID for your shop, either individually or by email: [contact@quarticon.com](mailto:contact@quarticon.com)

2. Log in to the administrative console of your AtomStore shop.

3. In Settings, select Store Configuration.
